Community Notices

DOG OWNERS please be considerate of other people and pick up your dogs droppings. Dog poo outside the shop is not a good look for our town and not nice for people to step in.

Earthquake

Factsheet
01

Earthquakes strike suddenly and without warning

They can strike anywhere and at any time as tectonic plates mash and grind against each other. You may think Australia is relatively safe, being in the middle of a tectonic plate, but we are actually rattled by roughly one small earthquake a day.

Earthquakes are the shaking, rolling or sudden shock of the earth's surface. Earthquakes happen along cracks (called fault lines) in the earth's surface. Earthquakes can be felt over large areas, although they usually last less than one minute. Earthquakes cannot be predicted — although scientists are working on it!

BEFORE:

- Prepare an emergency kit.
- Prepare a communication plan, make sure you have important numbers such as family and emergency contacts.
- Know the safe spots in every room – under a sturdy table or against an inside wall.
- Ask your family to hold earthquake drills – drop, cover, and hold on!

DURING:

- **DROP** to the ground.
- Take **COVER** under a sturdy table or other heavy furniture. If there is nothing to get under, cover your face and head with your arms and crouch near an inside wall.
- **HOLD ON** until the shaking stops.
- Stay away from windows, glass, lighting fixtures, or furniture that could fall – like bookcases.

AFTER:

- Expect aftershocks. They are usually not as strong but can cause damage.
- Open cabinets carefully. Objects might have moved and could fall on you.
- Wear long pants, long sleeves, and shoes to protect your skin from getting scratched by broken objects.
- Turn off electricity, gas, and water. Do not light matches. Check for gas or fuel leaks and damaged wiring.
- Unplug appliances and broken lights to prevent fire starts when the power is restored.
- Listen to the radio or television for information from authorities. Follow their instructions.

Building damage caused during the 2010 Kalgoorlie-Boulder earthquake.

IMPORTANT INFORMATION

- For life threatening emergencies call **000**.
- Stay calm and help others if possible. Contact number for SES **132 500**.
