COMMUNITY NOTICES

ACTIVE FARMERS 2022 Exciting news on the fitness front with Dimity adding new fitness classes to complement the ones already offered in Ongerup with Boyd. If you have been thinking about doing some fitness in 2022 there are a whole range of classes on offer for beginners up to the very fit sport players for you to choose from. Soft sessions are shorter, slower sessions targeted at seniors and those with restricted mobility, to get out of the house for some gentle movement with some friends and maybe even go for a coffee afterwards. Thursday mornings 10am at the Ongerup Sporting Complex. Contact Dimity 0448 233 985 for any questions.

TENNIS There are 2 nets set up at the tennis courts for anyone wishing to play at anytime. The nets will need to be tightened up and then loosened off at the end of your games. Social tennis is happening on Sunday mornings 9:30am. Anyone wanting to come along or needing a racquet, please contact Sandy 0428 282941 or Marnie 0487 771921

NOTICE OF PROPOSED SHIRE OF GNOWANGERUP ACTIVITIES IN THOROUGHFARES AND PUBLIC PLACES AND TRADING LOCAL LAW 2022

The Shire of Gnowangerup resolved at the Ordinary Meeting of Council held on 15th December 2021 to commence the process of making the proposed Shire of Gnowangerup Shire of Gnowangerup Activities in Thoroughfares and Public Places and Trading Local Law 2022.

The purpose of the proposed Local Law is to regulate private and commercial activities in thoroughfares and other public places in the Shire of Gnowangerup.

The effect of the proposed Local Law is protection of public health and safety; preservation of neighbourhood amenity; control of pedestrian and vehicle access to and movement within thoroughfares; protection of public infrastructure and local government assets; provision for objection and appeal rights against certain decisions; preservation of adequate access in thoroughfares for public works and utility services; provision for issuing approvals and permits for specified activities in thoroughfares and public places; and provision for the enforcement of this local law.

The local law may be inspected and copies obtained from the Shire office at 28 Yougenup Road, Gnowangerup during normal office hours.

Submissions made be sent to the CEO, Shire of Gnowangerup (gnpshire@gnowangerup.wa.gov.au) or by mail to CEO, Shire of Gnowangerup, 28 Yougenup Road, Gnowangerup, WA 6335, and will be accepted up to **4:00pm (AWST) Friday 18th March 2022.**

REQUEST FOR TENDER RFT2022-1 GNOWANGERUP TAMBELLUP ROAD SLK00.00 TO 12.78

In accordance with Regulations 11(1) and 14(1) of the Local Government (Functions and General) Regulations 1996 the Shire of Gnowangerup invites tenders from suitably qualified and experienced civil contractors to undertake the following:

Seal widening works and installation of audible edge line in the Gnowangerup Tambellup Road.

Tender documents may be obtained from the Shire Administration Office at 28 Yougenup Road, Gnowangerup during working hours of 8:30am to 4:30pm Monday to Friday, before the close of Tender. Alternatively, bidders can request an electric copy by contacting Anita Finn at the office at anita.finn@gnowangerup.wa.gov.au

Further information may be obtained from the Shire's Manager of Works, Yvette Wheatcroft, on 0439 791 925 or at Yvette.wheatcroft@gnowangerup.wa.gov.au

Tenders shall be valid for a period of 90 days after the Tender opening and can be lodged in the Tender Box at the Shire Admin Office, or emailed to gnpshire@gnowangerup.wa.gov.au on or before **Monday 31st January 2022, 2:00pm (AWST).**

COMMUNITY, CARBON & CONSERVATION

Building resilient landscapes by empowering farmers to rehabilitate marginal land, diversify income and conserve biodiversity.

The grassroots approach

BY FREYA SPENCER, GILLAMII

In October the Prime Minister announced a long-awaited commitment to reach net zero emissions by 2050. This follows on from other key announcements earlier this year such as Meat and Livestock Australia's Carbon Neutral by 2030 (CN30) publication in March and the State Government's \$15m investment in a new Carbon Farming and Land Restoration fund in July.

Net Zero is a term that often gets used with limited information on what it really means, or how it can be achieved both on-farm and nationally. For Australia, Net Zero 2050 means that by year 2050, the amount of carbon dioxide Australia is removing from the atmosphere will have to be the same as, or more than, the amount it is emitting. It is unsure at this stage what Net Zero 2050 will mean for the agricultural industry and individual producers but with 14% of Australia's greenhouse gas emissions coming from the sector, it is safe to say that any industry or government legislative change will have

widespread impact. Global net zero targets have also opened the door to an increased investment into the Australian Carbon Farming Industry.

In 2020, this increased investment coincided with a prolonged decreased investment in the Landcare sector and lead Gillamii, North Stirlings Pallinup Natural Resources (NSPNR) and Threshold Environmental to develop a partnership to empower farmers to rehabilitate marginal land, diversify income and conserve biodiversity. This initiative is now known as the Community, Carbon and Conservation Project. The project focuses on sequestration through biodiverse native plantings, with an emphasis on grassroots collaboration. Working with a group of progressive farmers, the project is currently underway restoring 550ha of marginal land through biodiverse carbon plantings with ecological restoration leader, Threshold Environmental. The project also encompasses 55km of protective fencing for the large-scale restoration sites, delivered by Gillamii and NSPNR, funded by the Western Australian Government's State NRM Program. Marginal land is land that traditionally has little or no agricultural value, however with

projects such as this one, marginal land can now offer farmers a new financial opportunity through diversified income, while also addressing on-farm environmental and production issues such as salinity, wind erosion and soil health.

In this project, diversified income is derived from the production (though the growth of vegetation) and sale of Australian Carbon Credit Units (ACCUs), which are formalised after each reporting period throughout the lifetime of the project. One carbon credit is the equivalent of one tonne of carbon dioxide gas, written as tCO₂e. ACCUs are essentially a unit of currency, which can be purchased in Australia to offset national emission requirements. The amount of ACCUs produced by a project depends on a multitude of factors such as the location, size and duration of the project (25 – 100 years). This has recently been a point of focus in news headlines as the price of ACCUs has more than doubled this year, with the spot price reaching a record high of \$36.50 in October 2021.

-  **Rehabilitating Marginal Land**
-  **Diversifying Income**
-  **Conserving Biodiversity**

As Net Zero targets formalise, ACCU value is rising, as large corporates seek to offset their emissions to comply with new targets. ACCUs can currently only be traded domestically in Australia, in Europe, during September 2021 the carbon price broke \$100 (€64) a metric tonne, with New Zealand reaching over \$60 (NZ\$65) a tonne. The more ambitious the country's Net Zero target, the higher the carbon price. With discussions of international trade arrangements being developed in the coming years, it is not unrealistic to expect ongoing fluctuations in the price of carbon.

The development, registration and management of Carbon Farming projects can seem complex to someone not familiar with the industry and for this reason individuals often partner with carbon service providers. These providers offer a variety of financial partnerships such as leases on land or a share in the ACCUs produced. To maximise local benefit, the Community, Carbon and Conservation project is being established and managed by Threshold Environmental with landholders maintaining the majority share of the credits produced.

the grassroots has allowed both Gillamii and NSPNR, as local grower groups, a unique opportunity to be involved in a large-scale Carbon Farming project. As the first year of the project reaches completion it has emphasized the complexity involved and the need for community involvement in both the development and establishment phase of the project. Each farmer has a different motivation, succession plan and piece in the landscape which cannot be overlooked and needs careful consideration. The project has also highlighted the need for increased industry education and awareness in regional communities. Competition among carbon service providers is strong, which means landholders have a range of options available to consider. Understanding the drivers of demand, limitations on supply and the associated risk is as important when making carbon farming decisions as it is within grain and livestock markets. It is important to understand the difference between generating carbon credits to offset industry emissions or generating credits for future on-farm offsets. If you're using your land to offset for a polluting entity, it can't also be used to offset your own on-farm emissions. Carbon Sink plantings are just one method for reducing overall on-farm carbon emissions and other options such as soil carbon, reducing livestock

emissions and reforestation are currently being established throughout the sector.

For Gillamii, NSPNR and Threshold Environmental, future years of the project will focus on strengthening current relationships with project farmers, taking time to assess the biodiversity outcomes of the large-scale plantings, as well as one-on-one training to assist each individual farmer to understand how to manage the ACCUs produced from the project over time. Resources will also be focused on baselining farms to understand net emissions and provide impartial assistance to individuals considering carbon farming projects, with hopes of empowering farmers to understand the complex industry, its risk and its potential.

For more information, please contact Freya Spencer at admin@gillamii.org.au

Building resilient landscapes by empowering farmers to rehabilitate marginal land, diversify income and conserve biodiversity.

This project is a collaboration between the Gillamii Centre, North Stirlings Pallinup Natural Resources and Threshold Environmental. This project is supported in part, by funding from the Western Australian Government's State NRM Program and Threshold Environmental. The project also acknowledges the commitment and involvement from all partner landholders.
